### **DETAILED ACTION**

1. Claims 1-35 are pending. Claims 7-16 and 21-35 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, claims 7-16 and 21-35 have not been further treated on the merits.

2. Claims 1-6 and 17-20 are under consideration.

### **Priority**

3. The priority statement at the beginning of the specification must be amended to indicate the current status of all priority applications.

### **Specification**

4. The disclosure is objected to because of the following informalities:

Page 18, line 24, "procedures include" should be either "procedures which include" or "procedures including".

Appropriate correction is required.

### **Claim Rejections - 35 USC § 112**

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-6 and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1645

The claims are drawn to a composition comprising lipid-based vehicles which comprise conjugates of the formula: A—(BC). B is a moiety comprising an internalizing peptide. C is a moiety comprising a biologically active agent. A is not defined concerning structure or function. The only restrictions on A appear to be that: A is a component conjugated to (BC) and appears to comprise a lipid (claim 2 and 6). Therefore, it is unclear what are the metes and bounds of component A.

### **Conclusion**

7. No claims are allowed.
